

556 AIRSOFT AEG UPGRADE WAIVER

By turning over my airsoft replica to 556 Airsoft for upgrade, I expressly understand and agree to the following:

1. Upgrades create unique stress on the components of an airsoft replica. By upgrading, I understand that reliability may be compromised by the upgrade.
2. 556 Airsoft will warrant any parts purchased from us and installed during the upgrade only. Other stock parts may wear out prematurely due to the upgrade, and I understand that these parts are specifically NOT covered under warranty.
3. Warranty replacement is for manufacturer defects in materials and/or workmanship only. Parts failing due to the additional stress of upgrading are NOT covered under warranty.
4. No warranty, express or implied, is given on the following gearbox components in any upgrade:

Piston
Piston Head
Tappet Plate
Air Feed Nozzle
Motor Pinion Gear
Gearbox Case
Trigger Switch/Wiring

5. I understand that the use of batteries larger than 8.4 volts in any airsoft gun can cause premature wear to the trigger switch assembly, and the use of any battery greater than 8.4 volts will void any and all warranties.
